

How to Post Your New Listing to Craigslist Using Your GettingListingsSold.com Dashboard

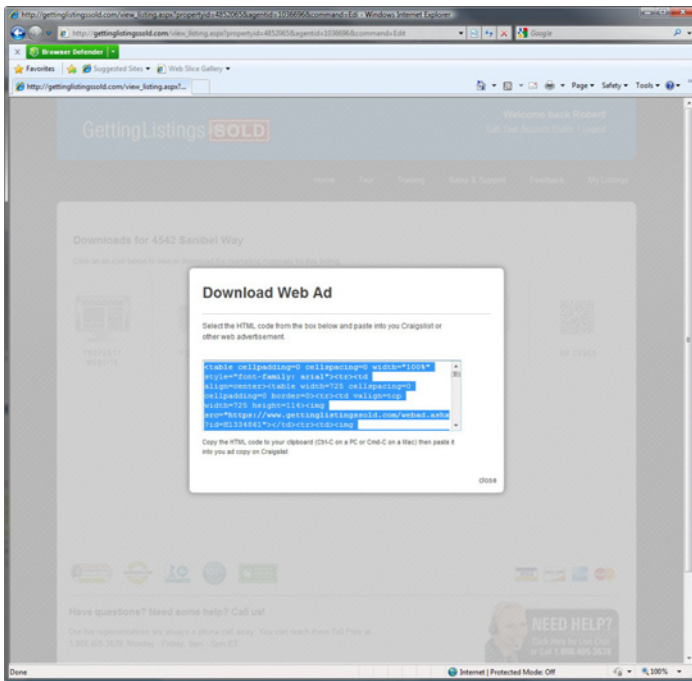

From the My Listings Control Panel on GettingListingsSold.com, choose the property you would like to create a Single Property Craigslist Ad for, and click the **Edit** button.

Next, click on the **Web Ad** icon. This will create the HTML code for you to copy and paste into Craigslist.

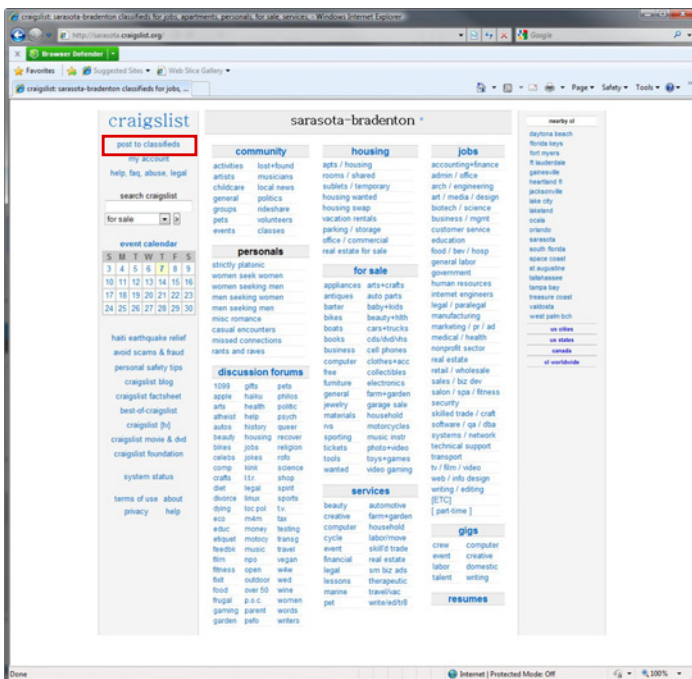

How to Post Your New Listing to Craigslist Using Your GettingListingsSold.com Dashboard

Now that the code is generated, press **Control-C** on a PC, or **Command-C** on a Mac, to copy the already highlighted HTML code to your clipboard.

Now you are ready for Craigslist.

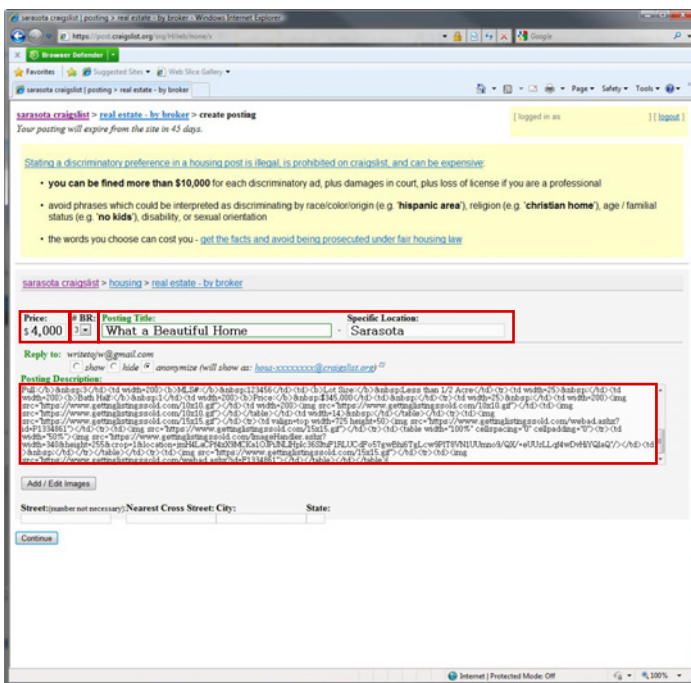

Go to www.Craigslist.org and login into your Craigslist account. Select the **Post to Classifieds** link - located in the upper left hand corner of the webpage. Navigate to the category in which you want to post your classified ad - this is usually Housing > Real Estate for Sale.

How to Post Your New Listing to Craigslist Using Your GettingListingsSold.com Dashboard

Enter the price, number of bedrooms, posting title and the specific location that you would like on your ad.

Click in the product description field and press **Control-V** on a PC, or **Command-V** on a Mac, to paste the HTML code for your Single Property Craigslist Ad, and click the **Continue** button.

You should now see a preview of your Single Property Craigslist Ad. Click the **Continue** button at the bottom of the page and you're done!
